

DRIFTWOOD WIND CHIMES AND MOBILES

Supplies: Driftwood, fishing line, beads, drills, scissors, etc.

As you visit the beach this winter, pick up thin pieces of driftwood like you see in the pictures (at least the size of a pencil width). Do not use the pieces that are easily broken.

Allow them to dry...don't keep them in a plastic bag. Gather lots so you can share with those members who were not able to collect driftwood.

At the craft date bring yourself, driftwood to share, beads to share and your threading skills. We will be drilling holes in the driftwood,

Double your fishing line to create a multiple fishing line loop at the top to hang this. Wrap around each piece of wood then down hole, add bead and continue. Tighten as you go. At the end add a bell or bead then triple knot at least! Don't cut too close to the knot.
